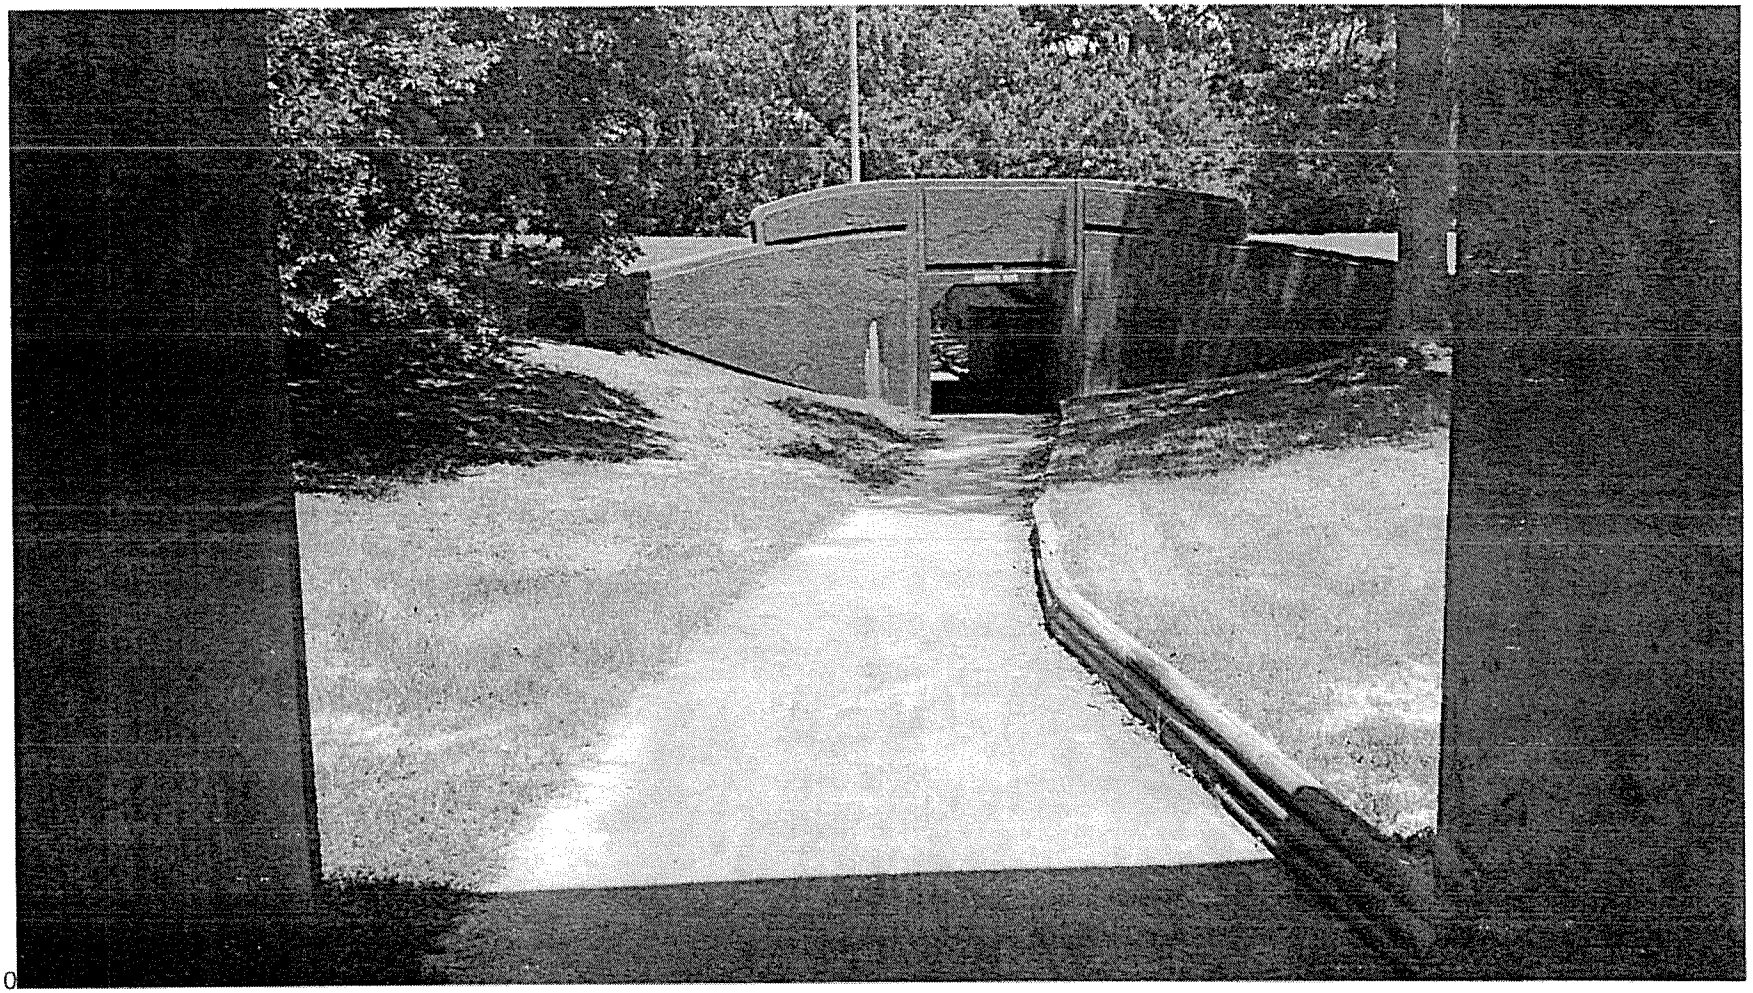
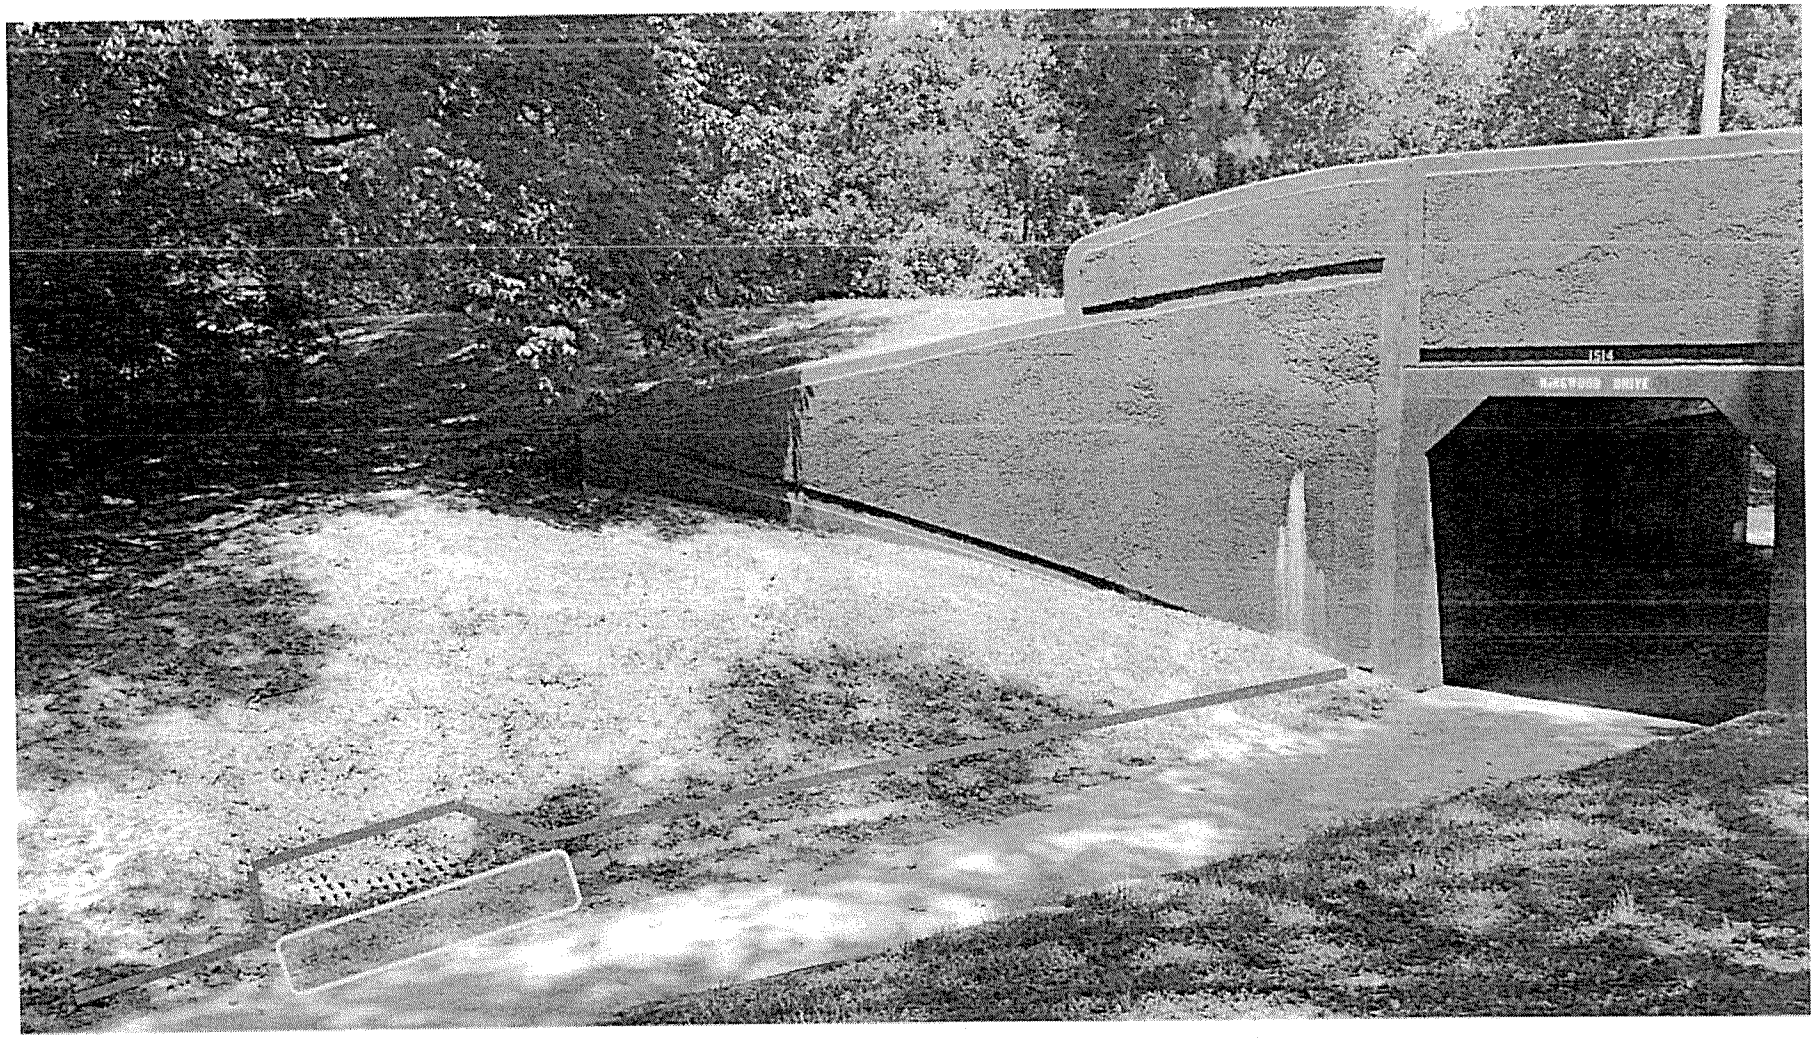
Appendix A

Plans for retaining wall along Kingwood Trails at tunnels 1514 and 1515.

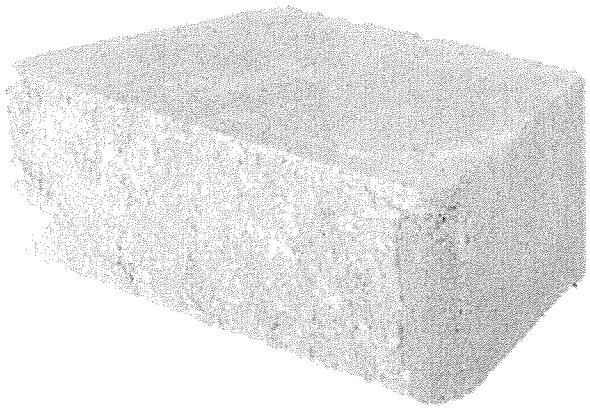


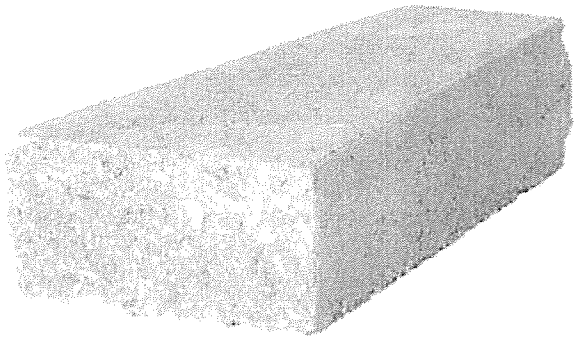
Work to be done: Approximately 75 ft of three brick high retaining wall on each side using 12" x 4" concrete wall blocks. Slope needs to be cut and area filled in behind retaining wall with clean fill (well-drained soil) and area sodded and seeded with winter rye to help with erosion.

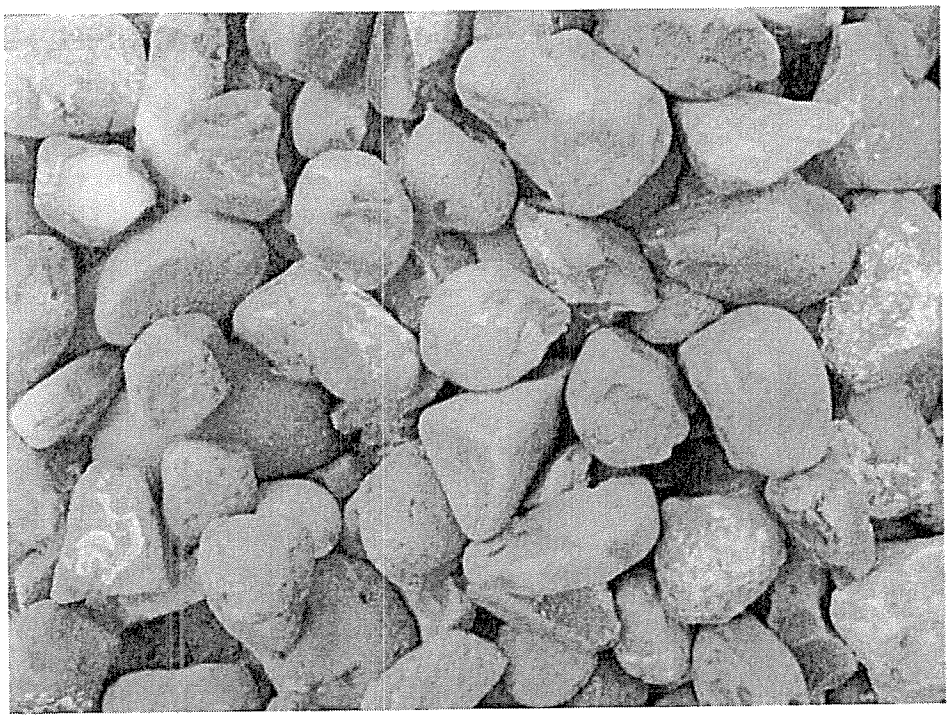
Appendix B



The retaining wall (red line) needs to go behind the drain and the area in front of the drain needs to have bull rock or equivalent between the drain and sidewalk.

Appendix C






Block and rock examples
