

ScanX Scout™

For Your Toughest Imaging Applications.

Built for the rigors of work in the field.

Engineering innovations put ScanX Scout ahead of the pack when it comes to rugged portability. The lightweight extruded aluminum frame helps to resist dents. Sturdy isolating / damping feet eliminate potential image quality issues due to external vibration. ScanX Scout is also available in a battery model making this system perfect for on-site applications. The rechargeable internal battery is capable of four hours run-time and has the ability to scan approximately thirty 14" x 17" imaging plates or approximately 510 linear inches. The battery design utilizes an internal charging module (PCB) which will restore charging power to the battery pack when an AC (90-264V) connection is applied to the main power inlet. The battery is fully recharged in less than two hours.

Excellent image quality, highly detailed digital images in seconds.

Developed exclusively for the security industry by ALLPRO Imaging, ScanX Scout is easy to deploy and produces high-resolution digital images in just seconds. Bomb technicians, EOD/IED specialists and other security professionals can swiftly obtain the data necessary to make critical decisions on the spot.

Designed for ease and speed.

ScanX Scout is especially easy to use. Imaging procedures are familiar because ScanX Scout builds on techniques you already use with film. Just expose the PSP with your existing X-ray generator. It takes three simple steps to obtain high-quality digital images – Expose, Insert and View. The ScanX Scout is a computed radiography system which utilizes durable, phosphor storage plates (PSPs) coated with an X-ray sensitive photostimulable material.

Durable and expandable.

The ScanX Scout is a great value and much more rugged than DR systems. Phosphor Storage Plates are extremely durable and reusable. DR panels contain glass plates and mirrors which are easily broken. Wires get tangled and connectors can become loose and damaged. And, with DR panels you are limited to the panel imaging area. ScanX enables multiple imaging plates to be assembled in a mosaic with a single exposure.

Specifications

Dimensions: 15 1/2 W x 17 1/2 L x 13 3/4 H
 Weight: 43 lbs. (without battery) 45 lbs. (with battery)
 Electrical: 50/60 Hz.
 Laser Classification: Class I Laser Product. Compliance with FDA HHS 21 CFR 1040.10 and IEC 60825-1
 Imaging Media: Phosphor Storage Plates, All standard and custom sizes.
 System Includes: Power Supply, USB Cable
 Warranty: 1 Year
 Battery: 24VDC
 Software: Compatible, third party software recommended (not included).
 Part Numbers: D5000-S (ScanX Scout w/o battery)
 D5000-SB (ScanX Scout w/ battery)

Computer Recommendations

CPU Speed: 3.0 GHz Intel CORE2
 Operating System: Microsoft Windows XP Professional (for a 32-bit Intel processor with Service Pack 2 or later or for a 64-bit Intel x64 processor) Microsoft Vista Business, Enterprise, or Ultimate (for a 32-bit Intel processor with Service Pack 1 or later or for a 64-bit Intel x64 processor with Service Pack 1 or later).
 RAM: 2 GB
 CD ROM Drive: CD/RW/DVD
 Hard Drive: 500 GB
 Optical Drive: Optical drive that is CD Rom compatible
 Monitor: SVGA 20", 1024x768 or higher resolution, contrast ratio 450:1, .22 dot pitch recommended.
 Video Display Adapter: 32 MB RAM
 Keyboard / Mouse: Standard keyboard and mouse
 USB Port/Version: USB 2.0 or later

ScanX Scout helps you to detect a threat in just a few steps:

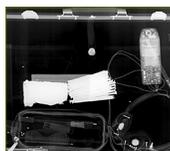

1. Position the PSP behind the suspect item.

2. Take an X-ray.

3. Feed the plate through the ScanX Scout.

4. View the image on your laptop in seconds.
