1.3 INDEMNIFICATION-SUBCONTRACTOR'S INDEMNITY

1.3.1 CONTRACTOR SHALL REQUIRE ALL OF ITS SUBCONTRACTORS (AND THEIR SUBCONTRACTORS) TO RELEASE AND INDEMNIFY THE CITY TO THE SAME EXTENT AND IN SUBSTANTIALLY THE SAME FORM AS ITS RELEASE AND INDEMNITY TO THE CITY.

If Prime Contractor does not assume the defense, the City shall assume and control the defense, and all defense expenses constitute an indemnification loss.

2.3.2 Continued Participation. If Prime Contractor elects to defend the claim, the City may retain separate counsel to participate in (but not control) the defense and to participate in (but not control) any settlement negotiations. Prime Contractor may settle the claim without the consent or agreement of the City, unless it (i) would result in injunctive relief or other equitable remedies or otherwise require the City to comply with restrictions or limitations that adversely affect the City, (ii) would require the City to pay amounts that Prime Contractor does not fund in full, (iii) would not result in the City's full and complete release from all liability to the plaintiffs or claimants who are parties to or otherwise bound by the settlement.

SPECIFICATIONS / SCOPE OF WORK

SOLICITATION NO. S51- T25321

1.0 PROCUREMENT OVERVIEW AND OBJECTIVES

1.1 The City of Houston's General Services Department (GSD) needs an integrated cloud-based system that combines project management or project planning, with many other aspects for managing capital construction projects. The Capital Project Management Software (CPMS) will be used for design and construction projects, provide information to various people or stakeholders, and justify the level of effort required to complete the project(s). The solution will need to address specific needs of GSD Design & Construction (D&C) including cost, schedule, and scope of each project as it moves from the planning stage to occupancy. Efficient management of documents, finances, schedule, and communication across all projects is required.

2.0 BACKGROUND

2.1 Currently, GSD does not have a system to track all elements of D&C projects. Project information is not configurable or entirely accessible; for example multiple parties cannot simultaneously access or update data. Tool will need to assist with increasing productivity, accountability, and control over costs and schedule, which ultimately reduces costs and utilizes time more efficiently. GSD D&C will significantly benefit from a flexible system that is Modular, Manages Workflows, Supports Collaboration, Reporting, Performance and Document Management.

3.0 SCOPE OF SERVICES

3.1 The selected professional services Vendor will provide the following services:

3.1.1 Recommendations & Analysis of the GSD D&C environment

- 3.1.2.3 The solution should assist D&C team to improve project selection decisions, prioritization, capital efficiency, and to better manage their project portfolios, consulting companies and client departments.
- 3.1.2.4 The collaborative feature should track all project tasks, issues, documents, calendars, and threaded discussions. Document can be bulk uploaded and should be version controlled.
- 3.1.2.5 The resource management feature should allow D&C team to have full visibility into their resource pool, control and utilization.
- 3.1.2.6 The risk management capability should assist the key project stakeholders meet commitments and minimize negative impacts on construction project performance in relation to cost, time and quality

- outcomes. The tool should assist GSD D&C team to identify, quantify and document the project risks and to make decisions around risk containment and mitigation policies.
- 3.1.2.7 The City should have access to the standard and ad hoc reports. Proposer should provide a list of all standard reports available to the City.

City prefers real time integration however; if real time poses a challenge then batch is acceptable as well. The interface should be significantly straight forward with minimum to no customization.
 - 3.1.2.11 The Proposer should configure the solution tailored to GSD D&C – processes are seamlessly integrated with the work flow.
